**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 28 April 2008.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## **DETAILED ACTION**

### ***Response to Amendment***

This office action is in response to amendment filed on 4/28/2008. Of the previously presented claims 7-17 and 21-23; claims 7, 15, and 21 have been amended and claims 12, 16, and 22 have been cancelled.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 7, 8-11, 13, and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Lo et al. (US 6,122,483) (hereinafter Lo).

Regarding claim 7, Lo teaches an apparatus, comprising a first electronic device (NCC) adapted to (column 3, lines 45-62):

organize at least some of multiple second electronic devices (subscriber units) into a group having similar predicted durations (T1, T2, or T3) for the subsequent data transmissions (acknowledge signal); and

transmit polls substantially simultaneously to ones-of the second electronic devices within the group (multicast message);

wherein the first electronic device is further adapted to determine the predicted durations based on durations of previously received transmissions from the second electronic devices (column 7, lines 32-48; the NCC determines groups based on responses within certain time durations T1, T2, or T3. Thus, the determination of the members of the second group would be based on the previously received transmissions of the members of the first group).

Regarding claim 8, Lo teaches the first electronic device is further adapted to receive the data transmissions from the second electronic devices within the group substantially simultaneously (column 4, lines 20-33; multicast message).

Regarding claim 9, Lo teaches the first electronic device is further adapted to transmit acknowledgements to the wireless devices within the group substantially simultaneously (column 4, lines 34-53).

Regarding claim 10, Lo teaches the first electronic device is further adapted to transmit polls to other second electronic devices within another group substantially simultaneously (column 7, lines 30-48; the multicast message is sent to all members).

Regarding claim 11, Lo teaches the first electronic device is further adapted to receive the predicted durations in transmissions from the second electronic devices (column 6, lines 47-67).

Regarding claim 13, Lo teaches the apparatus comprises:

a computing platform; and

at least four antennas coupled to the computing platform (figure 1, items 104, 102).

Regarding claim 14, Lo teaches the apparatus further comprises at least four modulator/demodulators coupled between the computing platform and the at least four antennas (figure 1, items 104, 102).

### ***Response to Arguments***

3. Applicant's arguments with respect to claims 7, 8-11, 13, and 14 have been considered but are moot in view of the new ground(s) of rejection.

### ***Allowable Subject Matter***

4. Claims 15, 17, 21, and 23 are allowed.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
